Professional Summary

Passionate and detail-oriented Web Application Developer with a strong foundation in React.js, JavaScript, TypeScript, and Laravel. Proficient in building responsive, user-friendly web applications and committed to crafting efficient and scalable solutions. Successfully developed and deployed four real-world projects, showcasing practical expertise in full-stack web development. Seeking to leverage my skills in a dynamic team to deliver impactful, technology-driven solutions.

Technical Skills

Frontend Technologies: React.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Inertia.js

Backend Technologies: Laravel, PHP

Database Management: MySQL

Version Control: Git, GitHub

Tools and Platforms: VS Code, Postman, Figma, Netlify

Projects

Accreditation Management System (Document Management System)

- Designed and implemented a comprehensive accreditation management platform using Vue.js, Inertia.js, Laravel, and MySQL.
- **Key Features:**
 - Management of accreditation instruments.
 - Document upload with version control.
 - Taskforce and program management.
 - Real-time chat functionality and commenting tools.
- Integrated evaluation tools with real-time updates and optimized performance via lazy image loading.

TAMS-Up (Training Attendance Monitoring System)

- Built a user-friendly attendance monitoring system utilizing React.js, Inertia.js, and Laravel.
- **Impact:**
 - Streamlined training attendance tracking and reporting, enhancing organizational efficiency.

Ellie's Cheesy Pizza (Inventory Management System)

- Developed an intuitive inventory management system using React, TypeScript, Inertia, and Laravel.
- **Key Features:**
 - User authentication and role-based access control.
 - Management of raw materials and finished goods.
 - Real-time notifications for low-stock items.
 - Visual sales reports and inventory analytics.

SDNHS-HRIS (Human Resource Information System)

- Created a robust HR management platform using React, TypeScript, Inertia, and Laravel.
- **Key Features:**
 - Personnel information management.
 - Leave application tracking with automated email notifications.
 - Real-time chat for streamlined communication.
- Leveraged Laravel and Inertia to deliver optimized performance and an enhanced user experience.

Education

Bachelor of Science in Information Technology

Davao del Norte State College, August 2019 – July 2023
